

## **Rec & Ed Sand Volleyball Covid 19 Protocol**- 6/4/2020

*Derived from USA Volleyball's "Return to play" guidelines, the CDC & other recreation agency resources.*

1. All players, managers, spectators, and staff must do daily symptom self-assessment. Anyone experiencing symptoms must stay home.
2. Mask use: Wearing of masks by players during games is permitted but not required. Site staff must wear masks when interacting with players and spectators. It is highly recommended that spectators wear masks.
3. Teams provide their own hand sanitizer and must use it before and after each set.
4. Site staff will sanitize the game ball before play begins and between sets.
5. There will be NO BLOCKING this season in any sand VB league.
6. Winning team reports each game score to the site supervisor who records all scores (no shared pencils). Staff also verbally verifies results after the match with the winning captain as a double check.
7. Team captain reports player names to site staff for a record of participants in each match. Site staff will record on the score sheet.
8. Players coming for the next match may warm up on the grass as long as they remain 6' from all others. **Players finishing should move away from the court area quickly so that the next teams can get on the court.** Teams must take all trash with them.
9. It is recommended that players limit bringing spectators, especially children. Children also may not be present without a non-playing adult to supervise them. Spectators bring their own chairs, sit physically distant from other spectators not in their own household, and may not enter the court.
10. No team handshakes before / after sets (a 'friendly wave')
11. Rock / paper/ scissors done from 6' apart at the net. No high fives or team "huddles" - step back some to talk.
12. Port a john use is "at your own risk".
