

# Ann Arbor Open Rock Wall Information

## Everlast Climbing Walls

Rock Wall Climbing is part of the "New P.E.," the physical education movement with a focus on lifetime fitness for EVERY student. Rock climbing is a dynamic activity that is attractive to a diverse group of people—even those not typically interested in physical activity. Climbing provides opportunities to build physical, cognitive, social and emotional skills.

## Traverse Walls

A Traverse Wall is climbed horizontally, not vertically. The wall is 8' or 10' high and comes in sections to allow for any desired length. The fun and challenge of a Traverse Wall is making it from one side to the other, rather than to the top. Students are never more than a few feet off the floor as they climb horizontally across, the wall. No ropes or harnesses are needed. Traverse Walls can occupy and optimize a variety of spaces--from gymnasiums to classrooms to hallways.

## Safety Mats

Safety surfacing is a critical part of any climbing wall. Everlast Climbing offers safety climbing mats AND a way to "close" your climbing wall all with one product--the patented Mat Locking System. 2" or 3" Safety Mats provide a cushioned landing surface when the wall is in use. When it's time to close the climbing wall, our cordless system is easy to use and helps prevent unauthorized climbing.
