

October 1, 2021

Dear Huron High School Community,

This letter is to notify you that a student who was last at Huron on **September 30, 2021** has reported being positive for COVID-19.

The AAPS COVID-19 Response Team is conducting the district contact tracing protocol in consultation with the Washtenaw County Health Department. Close contacts are being notified, and in-person learning can continue. If something changes, we will notify you as soon as possible.

All persons should monitor themselves closely for COVID-19 symptoms and review their exposure risk daily using [this questionnaire](#).

- **Any student with even mild symptoms** should stay home, get tested and quarantine until results come back. Anyone with a positive test result should alert the school office immediately and isolate for 10 days at home. The WCHD has information about local testing locations [here](#).
- **AAPS continues to encourage vaccination for students ages 12 and older.** Vaccinated students are less likely to become sick, and do not have to quarantine if exposed and have no symptoms. The COVID-19 vaccine is widely available at drug stores, doctor's offices, and at the [Washtenaw County Health Department](#).

We urge all families and students to monitor themselves closely for symptoms of COVID-19 and be cautious outside of school to reduce their exposure risk.

Please note that privacy regulations restrict us from sharing identifying/personal information about the individual(s) who have been diagnosed with COVID-19.

Please read this important quarantine and isolation FAQ [COVID-19 Quarantine and Isolation](#).

Sincerely,

Ché Carter Principal, Ann Arbor Huron High School
